PERSONALISED SUPPORT, POWERFUL RESULTS*

SPEAKER BIOS

Halis Akturk, MD | United States

Associate Professor of Medicine and Pediatrics, Barbara Davis Center for Diabetes, University of Colorado, USA

Dr. Akturk's research is focused on improving glycemic control with advanced diabetes technologies and therapeutics in people with type 1 diabetes. He has been the PI in many clinical trials assessing diabetes technologies and therapeutics such as hybrid closed loop pumps and continuous glucose monitors. He has been a part of the main clinical studies of Dexcom G7 10 and 15 days CGM. He is the recipient of American Association of Clinical Endocrinology (AACE) 2024 Rising Star Award. He is currently serving as the American Diabetes Association (ADA) Annual Scientific Meetings Planning Committee Chair for Diabetes Technology for 2024-2026. He served as the Communications Director of the American Diabetes Association, Diabetes Technology Interest Group between 2020-2024 and serves as the Publication Committee Chair for T1D Exchange. He is the founder and director of Diabetes Dialog, an annual hands-on diabetes technology workshop for nationwide endocrinology fellows. He published over 130 peer-reviewed articles and has been a reviewer in many reputable diabetes and diabetes technology journals. He has been an invited speaker for type 1 diabetes and diabetes technologies in many national and international conferences. He is the author of "Clinical Decision Algorithms in Diabetes" a recently published book from the American Diabetes Association Press.
