PERSONALISED SUPPORT, POWERFUL RESULTS*

SPEAKER BIOS

Nick Oliver, MBBS FRCP | United Kingdom

Imperial College London &
Imperial College Healthcare NHS Trust

Nick is a diabetes clinician and researcher, working in a multidisciplinary, cross-faculty translational research group at Imperial College London. His primary interest is exploring how to safely and effectively implement technologies for people living with diabetes. He has developed a large, innovative, and successful research group with active research in diabetes technology areas including continuous glucose monitoring, glucose control using closed loop systems, IT-driven diabetes care and diabetes prevention. Most recently he has undertaken research focused on how people with diabetes interact with devices and the impact of devices on diabetes stigma.

Nick is a type 1 diabetes and diabetes technology clinician delivering care at Imperial College Healthcare NHS Trust, one of the largest hospital groups in the UK. In this role he has helped to develop a Centre of Excellence for type 1 diabetes care and has established insulin pump, continuous glucose monitoring and intraperitoneal insulin services.
