PERSONALISED SUPPORT, POWERFUL RESULTS*

SPEAKER BIOS

Tina Linder, MD, PhD | Austria

Medical University of Vienna, Department of Obstetrics and Gynecology, Division of Obstetrics and feto-maternal medicine

Dr. Tina Linder holds a Master's degree in Languages and Business Management, with professional experience in this field. After several years working internationally, she pursued a career in medicine, driven by a deep interest in maternal and neonatal health. From the outset of her medical training, she focused on the effects of diabetes and obesity during pregnancy, particularly their short- and long-term consequences for both mother and child. Currently enrolled in a PhD program in Endocrinology, she investigates the metabolic and endocrine mechanisms underlying pregnancy complications and their broader health implications. Since entering the field, she has actively participated in numerous prospective and retrospective national and international studies and has published several papers on the impact and management of disturbed glucose tolerance and obesity on pregnancy outcomes.
