

David Kerr

MBChB, DM, FRCP, FRCPE | United Kingdom

Senior Investigator in Diabetes and Digital Health, Sutter Health Research Institute, Santa Barbara, California

David Kerr MBChB, DM, FRCP, FRCPE, a UK trained physician and endocrinologist, is currently Senior Investigator in Diabetes and Digital Health for All at the Sutter Health Research Institute in Santa Barbara, California. He also has an adjunct position at Rice University in the Dept of Computer Science and Electrical Engineering at Rice University and the Graduate School of Medicine at the University of Tokyo.

Dr. Kerr has published > 400 articles, commentaries and opinion pieces as well as co-authoring the first three books on diabetes and digital health.

Dr. Kerr's research has focused on wearable digital health technologies such as continuous glucose monitors for marginalized and historically excluded communities. This research has also included the use of "food-as-medicine" for adults with or at-risk of diabetes.

Dr. Kerr is also the digital health lead for the Diabetes Technology Society and a member of the editorial board of the Journal of Diabetes Science and Technology.

At Sutter Health, Dr. Kerr has found Hatarakigai.
